ELASTIC WEBBING

Founded in 2015 in Lithuania, GFC (Global Furniture Components) offers a range of high quality elastic belts (webbing) for various suspension and comfort applications.

To ensure longevity and durability and sustainability of GFC webbing products our belts are woven using only high elasticity modulus all natural rubber strings and recycled polypropylene yarn.

GFC webbing collection features two different quality levels in six different stretch levels from 0% to 100%. Each belt is color and line marked for easy identification.

Our RIGID 0% stretch belt can be chemically treated for use in outdoor furniture. GFC webbing products are also easy to use and handle. To help ensure consistent tension when attaching our webbing to the frame we mark our belts with dots every 5 centimeters.

All webbing types are packaged in small rolls of 50 or 100 meters and allow for convenient storage and practical placement on the production floor. Our standard belt widths are 60 mm making them all universally applicable for seat and back support.

OUR BELT FAMILY

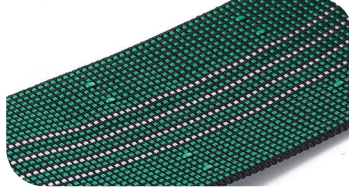

PREMIUM I (GREEN WITH 3 BLACK LINES)
MAX STRETCH 65%

STANDARD I (GREEN WITH 3 WHITE LINES)
MAX STRETCH 65%
