GFCSP002

Remark:

1. The shape effect is for reference only.
2. The diameter of mounting hole is 7mm, and suggest to use M6 screws to fix them.
3. Suggest to use T-nuts to fix with wooden frame.
4. When adjust within the installation size range, 4 installation tubes should be adjusted synchronously when installation.
5. Mounting brackets need face down for balance, and wooden frame should be empty to avoid interference between wheels and wooden frame to protect the life of wheels.
6. After the installation size is adjusted in place, lock the installation tube with screw.
7. To ensure the overall stability, the maximum installation size shall be determined according to the actual situation.
